SUMMARY

Second-year Computer Science student majoring in Artificial Intelligence at Swinburne University of Technology Sarawak, with project experience in machine learning, web development, software development, and IoT. Familiar with multiple programming languages and software development tools, with a strong willingness to learn and adapt to new technologies. Seeking an IT internship to apply technical skills, gain industry experience, and contribute to practical computing projects.

EDUCATION

SMA Gembala Baik Pontianak **2020 - 2022**
Science Program / MIPA

SMA Tarakanita 2 Pluit Jakarta **2022 - 2023**
Science Program / MIPA

Bachelor of Computer Science **2025 - Present**
Artificial Intelligence | Swinburne University of Technology Sarawak Campus | 3.75 CGPA

PROJECTS

- **Bird Species Classification | Deep Learning | Python, PyTorch**

Developed a bird species classification model using ConvNeXt-Tiny and transfer learning to classify bird images.

- **Traffic-Based Route Guidance System | Machine Learning | Python (Group Project)**

Role: LSTM Model Developer
Developed and implemented an LSTM model for traffic congestion prediction at different times, contributing to a system designed to support route recommendations.

- **Brew & Go | Web Development | HTML, CSS, PHP, SQL (Group Project)**

Role: Full-Stack Developer
Contributed to both front-end and back-end development using HTML, CSS, PHP, and SQL, including the implementation of application functionality and database integration.

- **Smart Ground-Truthing and Digital Biodiversity System | IoT, C++ (Ongoing Group Project)**

Role: IoT Lead Developer
Developing an IoT-based biodiversity monitoring system using ESP32 and environmental sensors, with responsibilities including sensor testing, hardware troubleshooting, and component integration.

- **Grimoire of The Ancient | C#, Object-Oriented Programming**

Developed a wizard-themed game using C#, applying object-oriented programming principles to structure game logic and implement interactive gameplay.

WORK EXPERIENCE

Part-Time Tutor | Ecclesiast Education Center — Jakarta, Indonesia **2023 - 2025**

- Taught Mathematics and Science to primary and junior secondary school students.
- Explained academic concepts and guided students through problem-solving exercises to strengthen their understanding.

INVOLVEMENT

Event Team | PPI Swinburne **2025 - 2026**

- Supported event planning, logistics, and coordination for student activities.

Vice President | PPI Swinburne **2026 - Present**

- Assisted with organisational activities, event preparation, and coordination with committee members.

TECHNICAL SKILLS

- **Programming Languages:** Python, C, C++, C#, PHP, JavaScript, SQL
- **Web Development:** HTML, CSS, PHP
- **Machine Learning:** PyTorch, TensorFlow, Deep Learning, Transfer Learning
- **Tools & Technologies:** Git, GitHub, Jupyter Notebook, Arduino IDE, ESP32, Flask
- **Soft Skills:** Problem-solving, Teamwork, Communication, Adaptability

LANGUAGES

- **Indonesian** — Native
- **English** — Advanced (C1)
- **German** — Intermediate (B1)
- **Malay** — Basic proficiency
